# A PRONOUNCING GAZETTEER

## CONTAINING MORE THAN TEN THOUSAND NAMES OF PLACES

In this GAZETTEER, the intention has been to record the names of such places as are of greatest interest in history and literature, both ancient and modern. Mere size, however, has not been considered a sufficient reason for inserting the name of a place, nor have all the names of a class, as, for example, the divisions of a country, been included unless each possesses individual distinction. American names, naturally, occupy a relatively large amount of space, but the names of all places that are of importance in general geography and history, especially in World War II, have been included. All cities in the United States having a population at the 1940 census of more than 5000 are entered.

For foreign countries, places have been entered under their names in the present official native language except in a comparatively few instances where usage has established a conventional form, as *Naples*, *Cologne*, *Copen-*

*hagen* (instead of the Italian *Napoli*, German *Köln*, Danish *København*). In many cases the older Anglicized form appears along with the present official spelling and often is given a vocabulary entry as a cross reference.

In these entries are given the location of each place, the height of mountain peaks, the highest elevation of mountain ranges or groups, the length of rivers, the population of cities and of countries, the area in square miles, and the name of the nation having jurisdiction, where this information is of interest, and often some item that marks the place as of note. Derivative adjectives and nouns often follow entries, as *Aberdonian*, *adj.* & *n.*

The letters E, N, S, W in this style of type and without a following period show direction or position only, as N Ohio (northern Ohio). Country seats are indicated by the symbol ☉, capitals by \*. For abbreviations used, consult the lists of Abbreviations, page xxi and page 998.

# A PRONOUNCING VOCABULARY OF COMMON ENGLISH GIVEN NAMES

The purpose of the following vocabulary is to present a list of such given names as are most frequent in English use. The list is not exhaustive either of the names themselves or of the variant spellings of those names which are entered. Compound or double names and surnames used as given names are not entered except in cases where long-continued or common use gives them an independent character.

Besides the pronunciations of the names, the lists below usually provide one or more of the following kinds of information at each entry: (1) Etymology, indicating the language source but not the original form of the name. (2) The meaning of the name, where known or ascertainable with reasonable certainty. (3) Foreign-language equivalents of each name in general use. (4) Diminutives that are well established or etymologically important.

NOTE: (1) Foreign-language equivalents of given names are added only when they are in frequent use among English-speaking peoples. If any of these forms has acquired an English pronunciation, it is given independent entry in these lists. (2) Diminutives are usually given in only one form when they follow the name from which they are derived; thus, *Fred* and *Fritz* are given at *FREDERICK*, but *Freddy* and *Fritzie*, which can be readily understood from the other forms, are not. If, however, the spelling of a diminutive is so different from that of the parent entry as to require its re-entry in its own alphabetical place, all of its forms are listed at this re-entry except variants in *-ie* or *-y*. (3) Some diminutives and contracted forms which are now used as given names (for example, *Madge* and *Maud*) are given independent entry regardless of their alphabetical position with respect to the parent name.

# VOCABULARY OF RHYMES

The purpose of this vocabulary of rhymes is to list only such words and pronunciations as are in current good use and as are in keeping with the practice of good poets who have exercised freedom in observing the rules of rhyming. Obsolete, dialectal, and illiterate words and pronunciations are not recognized. A few foreign words of frequent occurrence in English speech and writing have been entered. As a rule rhymes "to the eye," as *bough* and *though*, are very sparingly given.

There are two common forms of rhymes: rhymes of monosyllables or of final accented syllables (called *single*, or *masculine*, rhymes); rhymes of two syllables the first of which is accented (called *double*, or *feminine*, rhymes), such as *pastor*, *faster*, *aiding*, *fading*. Single, or masculine, rhymes are the more common, and are the only ones listed freely in this vocabulary.

## MASCULINE RHYMES

*Theory and practice in rhyming.* Theoretically, a rhyme is the correspondence, in two or more words or verses, of terminal sounds beginning with an accented vowel, which, in modern English usage, must be preceded by different consonant sounds, or by a consonant sound or sounds in one case and none in the other. In strict rhyme there is, therefore, exact correspondence in sound and also exact correspondence in accent. In practice, however, these theoretical standards are not always strictly observed and more or less freedom is exercised even by careful poets. This vocabulary includes many rhymes sanctioned by good usage under the extensions of the rules noted in the following paragraphs.

*Correspondence in accent.* Strictly speaking, single rhymes consist only of monosyllables or of final syllables having a primary accent. There are, however, many polysyllables which, having a primary accent on the antepenult, receive on the final syllable a secondary accent of sufficient strength to make it proper to use these words in single rhymes; thus, *accumulate* may be used to rhyme with *dale* or *create*, *expedite* to rhyme with *sight* or *benight*. In polysyllables, such common terminations as *-an*, *-ant*, etc., are usually slighted in pronunciation, so that the vowel quality is obscured, as in *pelican*. Consequently under *-AN*, *-ANT*, etc., this vocabulary restricts its choice of words of more than one syllable to those which have a primary accent on the last syllable or, in the case of polysyllables accented on the antepenult, an unslurred final syllable, as in *sedan*, *caravan*, *supplant*, *epitaph*. Furthermore, only monosyllables which, because of their importance to the thought, are likely to carry the speech accent are entered. Certain monosyllabic words usually slurred over in speech, as prepositions and articles, are therefore excluded as not proper to serious verse. The chief principle to be observed in exercising freedom regarding correspondence of accent is that no rhyme be forced and that accepted pronunciations and customary speech accents be respected. In this connection, it should be noted that in many words of the same spelling and derivation, as *contract*, the accent is not placed on the same syllable in each part of speech, and that in others, as the noun *recess*, a change in sense may mean a change in accent. For this reason, use of the main vocabulary of the dictionary will sometimes be necessary in determining the part of speech or the sense in which a word may be used as a rhyme.

*Correspondence in sound.* Strictly speaking, the terminal vowel sounds should exactly correspond, but poets (1178)

sometimes use rhymes in which the vowels are not exact homophones. In the vocabulary of rhymes, broad differences in terminal sounds, as in words ending in *-age*, are shown by multiple entries and multiple lists of words, but slight differences in the quality of terminal vowels are not so differentiated. Words differing but slightly are usually, as at *-ANT*, included under one entry. Those who seek close or delicate correspondence in sounds should consult the main vocabulary and the numbered sections of the Guide to Pronunciation to which cross reference is made.

*Rhymes by contraction, elision, etc.* The final two syllables of a word are often pronounced like a single syllable with a long vowel sound, by slurring over or slighting one of the syllables in the pronunciation, or by dropping a consonant or vowel. Thus *plyer*, *higher*, as ordinarily pronounced, may be used to rhyme with *lyre*, *fire*; the poetical *o'er* to rhyme with *lore*, *roar*; the poetical *ne'er* to rhyme with *care*, *stair*.

*Words differently pronounced.* For some words, more than one pronunciation is recognized as being in good usage, and the more common of these, when they can be used in single rhymes in either or both pronunciations, are given in this vocabulary in each group with which they may rhyme; thus, *trait* (see pron. in main vocab.) is given under *-ATE* and *-AY*, *wrath* under *-ATH* and *-OTH*, etc. This rule does not hold for foreign words that have two pronunciations.

*Vocabulary arrangement* Only that part of the word or last syllable is considered which corresponds in sound with that of its rhymes, and this part of each word is treated as a termination or ending. All of these terminations must, therefore, begin with the last sounded vowel or diphthong of the word; hence any particular word with its rhymes can be readily found in this vocabulary by looking for such ending. Thus in the case of *hand*, *made*, *brain*, *league*, *due*, *blight*, *amend*, *pontoon*, *terminus*, etc., look in the lists below for *-AND*, *-ADE*, *-AIN*, *-EAGUE*, *-UE*, *-IGHT*, *-END*, *-OON*, *-US*, etc., respectively, and under those entries will be found either the rhyming words or references to the headings under which they are given. Rhyme groups are in all cases given under the accented vowel sound. Thus *done* and its rhymes will be found under *-UN*, *sign* under *-INE*, *warn* under *-ORN*, *yacht* under *-OT*, etc.

Rhyming lists can also be extended by consulting entries to which there is a "Cf." reference. Thus under the entry *-OOP* will be found a reference "Cf. *-UPE*."

## FEMININE RHYMES

Theoretically, feminine rhymes occur at the ends of lines in trochaic, amphibrachic, and dactylic meter; actually, they often also occur when the poet, for one reason or another, wishes to add a hypermetrical syllable or syllables. They are also called double (or triple) rhymes because there must be correspondence in sound and accent between the last accented syllable and the following syllable or syllables. The rule for masculine rhymes requiring a consonantal difference (sometimes by omission of one consonant) before the rhyming sounds holds good here for the accented syllables of the feminine rhyme but not for the unaccented syllables, which must be identical in sound; thus *tabard* rhymes with *scabbard*, *feather* with *heather*, *pastor* with *master*, *furious* with *penurious*. Because of this rule, it is not easy to find many words which serve as feminine rhymes.

It is well for the versifier in need of a group of rhyming

# ORTHOGRAPHY

Spelling changes advocated by Noah Webster in his *Dictionary* (1828) have had considerable influence upon orthography, especially in the United States. These changes were proposed by him chiefly on the basis of etymology and of analogy with the dual object, first, of making the words correspond, as far as practicable, with their primitive forms in order to reveal more obviously their etymological affinities, and second, of reducing the number of anomalies and exceptional cases.

It is to be observed that many of these deviations from the usage of his time were not innovations, but restorations of older forms which were once generally employed. For example, the spelling with the termination *-er* of words often written with *-re*, as *meter*, and the spelling with *-or* of words often written with *-our*, as *color*, are but restorations of older spellings.

Presented below are some of Noah Webster's spelling rules as they have been modified in American practice.

## RULES FOR SPELLING

§ 1. Words ending in *c* have a *k* inserted when adding a termination beginning with *e*, *i*, or *y*, to prevent the *c* from being pronounced like *s*: as, *shellac*, *shellacked*; *picnic*, *picnicker*; *panic*, *panicky*. Exceptions: *arc*, *arced*, *arcing*; *disc*, *disced*, *discing*; *zinc*, *zincic*.

§ 2. Final consonant doubled. Monosyllables and words accented on the last syllable, when ending in a single consonant *b*, *d*, *f*, *g*, *k*, *l*, *m*, *n*, *p*, *r*, *s*, *t*, *v* preceded by a single vowel, double the consonant before adding a termination beginning with a vowel or the suffix *-y*: as, *club*, *clubbed*, *clubby*; *forbid*, *forbidding*; *if*, *iffy*; *rebel*, *rebellious*; *plan*, *planned*, *plan'ning*, *plan'ner*; *bag*, *bag'gaged*; *hot*, *hot'ter*, *hot'test*; *abel*, *abel'ted*, *abel'ting*, *abel'tor*; *infer*, *inferred*; *rev*, *revved*. The consonant is doubled to preserve the vowel sound of the base. Thus, *planned*, *hottest*, and *abelted* would naturally be pronounced *plāned*, *hōttest*, and *ābel'ted* if the consonant were not doubled. Derivatives of a few words having a long vowel sound in the accented final syllable follow the rule, as *control*, *controlled*, *controllable*, *controller*; *extol*, *extolled*; *patrol*, *patrolled*, *patroller*.

Verbs ending in *r* with few exceptions follow the rule in uniting with *-able*, *-al*, *-er*, as *averrable*, *barrable*, *conferable*, *conferral*, *conferer*, *deferable*, *defferrable*, *incurrable*, *slurrable*, *spurrable*, *stirrable*, but the few compounds with *r* doubled before *-ible* are not preferred spellings.

EXCEPTIONS: (1) Derivatives of *gas* (except *gassed*, *gas'sing*, and *gassy*): as, *gas'eous*, *gas'tify*. (2) Derivatives in which the accent of the base is thrown back on another syllable: as, *infer*, *infer'ence*; *refer*, *refer'able*; *defer*, *defer'ence*; *prefer*, *prefer'able*. (3) *Chagrin*, *chagrined*, *chagrining*. Since *chagrin*, which in British use rhymes with *green*, rhymes in the U. S. with *grin*, *chagrinned*, *chagrinning* would be justifiable in the U. S.

§ 3. Final consonant not doubled. Words having primary accent on any syllable but the last, words ending in more than one consonant, and words ending in a single consonant preceded by a diphthong or vowel digraph do not double the final consonant before adding a termination beginning with a vowel or the suffix *-y*: as, *revel*, *reveled*, *reveling*, *reveler*; *profit*, *profited*; *catalog*, *cataloged*; *act*, *acted*, *actor*; *doub*, *daubed*; *need*, *needy*; *brief*, *briefer*, *briefest*; *tread*, *treading*.

EXCEPTIONS: (1) *Humbug*, *humbugged*, *humbugging*. (2) Derivatives of *kidnap*, *benefit*, *carburel*, and *program*, whose ultima has a secondary accent, are spelled properly either with or without the final consonant doubled: as, *kid'naped* or *kid'napped*, *kid'nap'ing* or *kid'nap'ping*, *kid'nap'er* or *kid'nap'per*; *benefited* or *benefitted*; *carbureted* or *carburelled*; *programed* or *programmed* (but only *programmatic*). (3) *Worship*, *worshiped* or *worshipped*, *worshiper* or *worshipper*.

NOTE. According to some lexicographers, a large class of words ending in a single consonant and accented on some other syllable than the last (including all verbs ending in unaccented *cl*) double the final consonant before a vowel in derivatives: for example, *apparel*, *bevel*, *cancel*, *cavil*, *counsel*, *cudgel*, *dial*, *dishevel*, *duel*, *empanel*, *enamel*, *equil*, *gambol*, *grovel*, *imperial*, *jewel*, *label*, *level*, *libel*, *marshal*, *marvel*, *medal*, *metal*, *model*, *parcel*, *pencil*, *quarrel*, *ravel*, *revel*, *rival*, *shrivel*, *travel*, *yodel*. See § 27, below.

§ 4. Double consonant retained. Words ending in a double consonant commonly retain both consonants when adding terminations: as, *ebb*, *ebbing*; *odd*, *oddy*; *stiff*, *stiffness*; *will*, *willful*, *willfulness*; *dull*, *dullness*. So also the double *l* is retained in the preferred forms of the words *installment*, *enthralment*, *thralldom*, and *enrollment*, in order to prevent an erroneous pronunciation with short *ā* or short *ō*. See § 27, below.

EXCEPTIONS: (1) The adjective forms of *pontiff* have a single *f*: *pontific*, *pontifical*. (2) The adverbs *illy*, *dully*, *fully*. (3) Skillless and similar derivatives in *-less* of words ending in *ll*, which are alternate forms to the commoner forms ending in *ll-less*, as *skill-less*.

§ 5. Silent *e* retained. Words ending with silent *e* generally retain this *e* when the termination begins with a consonant: as, *awesome*, *doclike*, *hateful*, *incitement*, *issueless*, *judgeship*, *paleness*, *ropelike*, *shapely*.

EXCEPTIONS: (1) A few words ending in silent *e* immediately preceded by another vowel (except *e*) drop the *e* in forming derivatives: as, *due*, *duly*; *argue*, *argument*; *true*, *truly*. (2) *Abridgment*, *acknowledgment*, *fledgling*, *lodgment*, *judgment*, *wholly*. Cf. § 28, below.

§ 6. Silent *e* omitted. Words ending with silent *e* generally drop the *e* before terminations beginning with a vowel: as, *base*, *basal*; *force*, *forcible*; *guide*, *guidance*; *hoe*, *hoed*; *plume*, *plumage*; *scale*, *scalable*; *shape*, *shaping*; *statue*, *statuesque*; *sue*, *sued*; *true*, *truism*.

EXCEPTIONS: (1) The *e* is retained in *hoeing*, *shoeing*, and *toeing*, but is generally excluded from *shoer*. (2) The *e* is retained in *dyeing*, *singeing*, *swingeing*, *tingeing* (from *dye*, *singe*, *swinge*, *tinge*), to distinguish them from *dying*, *singing*, *swinging*, *tinging* (from *die*, *sing*, *swing*, *ting*), but no *e* is needed in *cringing* or *impinging* because there is no verb *cring* or *imping* to be confused with *cringe* or *impinge*. (3) Words ending in *ce* or *ge* retain the *e* before terminations beginning with a *v* or *o*, to prevent the *c* or *g* from being pronounced with the hard sound: as, *notice*, *noticeable*; *manage*, *manageable*; *advantage*, *advantageous*. *Mortgagor*, pronounced *mort'gajor*, from *mortgage*, is exceptional. (4) *Mileage*. (5) A few derivatives in *-able* in which *e* is regularly retained by many writers: as, *likeable*, *useable*, *saleable*.

§ 7. **Ending -ing added to ie.** Words ending in *ie* generally drop the *e* and change the *i* to *y* when adding -ing, so as to prevent two *i*'s from coming together: as, *die, dying; tie, tying or tying; hie, hying or hicing.*

§ 8. **y preceded by a consonant.** Words ending in *y* preceded by a consonant usually change the *y* to *i* before any termination except one beginning with *t*: as, *icy, iciest, icily, iciness; mercy, merciless; modify, modifiable, modifies; pity, pitiable, pitiful; but thirty, thirtyish.*

EXCEPTIONS: (1) Adjectives of one syllable have comparative and superlative forms in both -ier, -iest and -yer, -yest: as, *shy, shier or shyer, shiest or shyest; spry, spryer or spryer, spriest or spryest; but drier, driest* are commoner than *dryer, dryest*, and the noun *dryer* is preferred for an apparatus in distinction from *drier* for a chemical. (2) Adjectives of one syllable usually retain the *y* before -ly and -ness: as, *shy, shyly, shyness; wry, wryly, wryness; but dryly and drily* are about equally common, also *styly* and *stily*. (3) *Flier* and *flyer* are both in good use. (4) Before -ship and -like, as *secretaryship, citylike*, and in derivatives formed from *baby* and *lady*, the *y* is retained: as, *babyish, ladykin*. (5) The *y* is retained in the plural of proper names: the *Storrys*. (6) The *y* is retained in *busyness* (busy state). (7) The *y* is retained in the possessive case: as, *everybody's*.

§ 9. **y preceded by a vowel.** Words ending in *y* preceded by a vowel generally retain the *y* unchanged before all terminations: as, *obey, obeying; joy, joyful; gay, gayer, gayest; gluey, glueyness (but glazier, glazier).*

EXCEPTIONS: *Daily, laid, said, slain* (from *day, lay, say, slay*). *Gaily* and *gayly* are in equally good use, likewise *gaily* and *gayety*.

§ 10. **Spelling of a final vowel sound retained.** Words ending with a vowel sound retain the letter or letters representing such sound before a termination beginning with a vowel: as, *loga, logaed; agree, agreeable; weigh, weighing; ski, skied, skier; taxi, taxied, taxiing; charivari, charivariad; veto, (he) vetoes; dough, doughy; cameo, cameod; bow, bowed; shampoo, shampooed.*

NOTE 1. The 3d person singular present indicative of verbs ending in two vowels takes -s, not -es: as, (he) *radios, (a cow) moos, (it) hoooods*.

NOTE 2. Words ending in *ee* drop the final *e* before a termination beginning with *e*: as, *free, freer, freest*.

§ 11. **Compound words formed by joining two or more words** (in distinction from certain above-mentioned derivatives and from portmanteau words) commonly retain all of the letters of the simple words: as, *airstrip, beachhead, carryall, rove-over, flare-up.*

## PLURALS

For irregular plurals, as of *foot, mouse, ox*, and for plurals retained from foreign languages, as of *genus, crisis, focus*, see the individual words and also the *Note* under the word **PLURAL** in the *Vocabulary*.

§ 12. **The plural of English nouns regularly ends in -s, or, in certain classes of words, in -es.**

When the singular ends in a sound with which *s* can unite and be pronounced without forming a separate syllable, -s only is added in forming the plural: as, *bays, woes, virtues, claws, chiefs, paths, aches, plagues, acts.*

When the singular ends in a sound (as that of *ch* in *much, sh, j, s, x, z*, or *z*) with which *s* cannot unite in pronunciation but must form a separate syllable, *e* is inserted before -s in forming the plural, unless the word ends with silent *e*, which then forms a separate syllable with -s: as, *church, churches; rush, rushes; edge, edges; gas, gases; case, cases; box, boxes; maze, mazes.*

The plural ending -s following a vowel or voiced consonant (pronounced *b, m, v, d, n, g, ng, l, r*) and the plural ending -es are both pronounced with the voiced sound *z*; the plural ending -s following a voiceless consonant (pronounced *p, f, t, k* as in *thin, k*) is pronounced with the voiceless sound *ss*. For nouns ending in a voiceless sound in the singular and the voiced sound in the plural (*life, lives*), see *Guide to Pronunciation*, § 99.

**Plurals of nouns ending in o.** All nouns ending in *o* preceded by a vowel add -s only: as, *cameo, radio, zoo*. Proper names ending in *o* add -s only: as, *Filipino, Eskimo, Romeo*. Nouns ending in *o* preceded by a consonant fall into four classes: (1) Taking -s only, including infrequently used nouns, infrequently pluralized nouns, very long nouns, nouns bearing the stamp of foreign origin, as well as many others: as, *albino, chromo, credo, crescendo, ditto, dynamo, electro, embryo, kimono, lean-to, magneto, medico, mestizo, octavo, photo, piano, poncho, pro, pueblo, shako, silo, solo, two, tyro*. (2) Taking -s usually but sometimes -es: as, *avocado, banjo, commando, flamingo, gecko, halo, indigo, junco, lasso, memento, palmetto, politico, pronunciamento, proviso, salvo, tobacco, tuxedo, zero*. (3) A small number of nouns taking -es usually but sometimes -s: as, *archipelago, buffalo, calico, cargo, desperado, dido, fresco, grotto, hobo, linga, mango, manifesto, mosquito, motto, peccadillo, portico, sluice, virago, volcano*. (4) A small number of nouns taking -es only: as, *dingo, echo, embargo, go, hero, innuendo, jingo, mulatto, Negro, potato, tomato, tornado, torpedo, velo*.

**Plurals of nouns ending in i** are preferably formed by adding -s: as, *rabbi, rabbis; alibi, alibis*.

**Plurals of letters, figures, signs, abbreviations, and words named merely as words** are formed by adding -s. An apostrophe which according to the older convention regularly preceded the -s is omitted by more and more writers and printers where no ambiguity is likely: as, the three *Rs* or *R's*; dotted both *i's*; two *l's* in *all*; hisses his *s's* (or *esses*); the two *Os* or *O's* in *400*; a group of *B-29s* or *B-29's*; in the *1920s* or *1920's*; a man in his *30s* or *30's*; *Gl's* or *GI's* or *G.I.'s* or *G.I.s*; *Ph.D.'s* or *Ph.D.s*; three *iis* or *ii's* in one sentence.

**Plurals of a certain few abbreviations** are formed by doubling the (final) consonant; as, *cc., chapters; ff., folios; M.M., Messieurs; pp., pages; Qq., quartos; spp., species; vv., verses, violins*.

§ 13. **Nouns ending in y preceded by a consonant or by u pronounced as a consonant** form their plurals by adding -es and changing *y* into *i*: as, *mercy, mercies; sky, skies; soliloquy, soliloquies*. But proper names usually take -s: as, three *Hail Marys*; two *Germanys*.

**Nouns ending in y preceded by a, e, o, or u** (except *u* pronounced as a consonant) form their plurals by adding -s only: as, *key, keys; alloy, alloys; guy, guys*.

§ 14. **Nouns ending in f, fe, or ff for the most part** form their plurals by the addition of -s only: as, *belief, chief, grief, handkerchief, motif, oaf, proof, reef, roof, serif, waif; sife, safe, strife; cuff, culoff, gaff, mastiff, plaintiff, sheriff*. A few, however, change *f* or *fe* into *ves*: as, *calves, elfs, half, leaf, loaf, self, sheaf, shelf, thief, wolf; knife, life, wife*. The nouns *beef, scarf, and wharf* regularly add *ves*, sometimes -s; *hoof* and *turf* regularly add -s, sometimes *ves*. See **STAFF** in the *Vocabulary*.

## VARIATIONS IN USAGE

§ 15. **em- or im-, en- or in-.** Among words beginning with *em-* or *im-*, as *embed* or *imbed*, and *en-* or *in-*, as *endorse* or *indorse*, usage varies. In some *em-* is preferred, as *empower*; in some *en-* is preferred, as *enclose, entrust*; in some *im-*, as *impale*; in some *in-*, as *incrust, inquire*; in some *em-* is preferred for certain senses, *in-* for other senses, as *ensure, insure*.

§ 16. **-er or -re.** American usage prefers -er for words of the *center, meter, theater* class, but many American writers prefer -re in particular words, especially *theatre*. (Cf. § 23, below, for British usage.) *Acre, chance, lucre, nacre, massacre, ogre, and euchre* retain the termination -re, to show the hard sound of the *c, g*, and *ch*.

§ 17. **-id or -ide.** Chemical -ide is preferred to -id.

§ 18. **-ize or -ise.** Two classes of verbs having *i* as the next-to-last sound and *z* as the last sound are distinguished in taking the -ize or -ise spelling: (1) Verbs derived from Greek verbs in -izein (as *euphemize, ostracize, paralogize, prologize, syllogize, synchronize*) or through Latin or Old French or French from Greek (as

*anathematize, baptize, catechize, cauterize, characterize, evangelize, stigmatize, tyrannize*) properly have the termination *-ize*. Those verbs having a similar Latin background, as with a Late Latin ending *-izare* or an Old French ending *-ir, -iss*, but derived from French (as *amortize, dramatize, naturalize, pulverize, satirize, temporize*) likewise have the termination *-ize*. Exception: *exorcise*, though ultimately from Greek *exorkhsein*, commonly has *-ise* corresponding to *exorcise*. Verbs formed by adding *-ize* or *-ise* to English words are by analogy spelled with *-ize* (as *animalize, botanize, criticize, legalize, memorize, modernize, oxidize, patronize, sterilize*). Exception: *chastise*, derived from *chasten* + *-ise*. The verbs of this class have in older British usage followed the French spelling with *-ise* (see § 21, below) in contrast

to American spelling with *-ize*. Spellings with *-ise* are not generally given in this dictionary where they are mere variants of *-ize* forms.

(2) The following verbs and corresponding nouns borrowed from Old French or French end in *-ise*, with rare instances of variant forms in *-ize*: *advertise, advise, franchise, affranchise, disfranchise, disenfranchise, enfranchise, compromise, demise, despise, devise, disguise, excise* (duty), *improvise, merchandise, revise, surmise*; likewise *circumcise, excise* (cut out), and *superwise*, borrowed from Latin. Verbs and nouns derived from compounds of the French verb *prendre* (participle *pris* or *prise*) regularly end in *-ise*: *apprise* (inform), *comprise, emprise, enterprise, surprise*. *Apprise* (appraise), from Old French *aprisier*, is preferred to *apprise*.

## BRITISH SPELLING PREFERENCES

Certain differences are noticeable between the spelling practices of books and papers published in the British Commonwealth and American practices. The main points of divergence that persist despite interchange of publications are outlined in the following paragraphs.

§ 19. *ae, oe*. In common words derived from the Latin or Greek in which American usage has pretty generally replaced *ae* or *oe* by *e*, British usage prefers the forms with *ae* or *oe*, often written as ligatures: as, *aesivale* (or *aestivale*), *encyclopaedia, palaentology, oecology, oecumenical, foetus, homoeopathy*. And in such semi-technical words as *anaemia, anaesthetic, faeces, orthopaedic, oedema, oesophagus, asafetida* British usage permits only *ae* or *oe*, whereas these forms in American usage have been superseded by *anemia, anesthetic, etc.*

§ 20. *em-, en-, im-, in-*. British usage favors the *em-* and *en-* forms practically to the exclusion of *im-* and *in-* forms, which are in certain cases still the commoner in American usage: as, Brit. *empanel, encase, encrust, ensfold*; U. S. *impanel, incase, incrust, infold*. A few British exceptions using *in-* are: *incrustation, ingrained, inquire, inquiry, insure* (financial sense), *inure, inweave*.

§ 21. *-ise, -ize*. In British printing the forms in *-ise* have in the past been the commoner, but the trend of usage, influenced by the *Oxford English Dictionary* and the practice of the *Encyclopaedia Britannica* and the *London Times*, is to adopt more generally the *-ize* forms and their derivatives in *-ization, -iser, -izable*. Thus, whereas *apologize, capitalize, dramatize, satirize, visualize, visualization, etc.*, are the exclusive American forms, both forms *apologize* and *apologise, capitalize* and *capitalise, etc.*, are in use in Great Britain. In Canadian official and literary usage *-ize* has been adopted; Indian, South African, and Australian usage favors *-ise*. The words of this class are not to be confused with the verbs not etymologically related which are always spelled *-ise*. See paragraph (2) of § 18, above.

§ 22. *-our, -or*. In words of the *colour, color* and *honour, honor* class, the forms in *-or* are regarded as non-British, thus differing from particular words, as *horror, pallor, squalor, torpor, tremor*, always spelled *-or*, which are indistinguishable in form and origin from this class. Among the derivatives of *colour, honour, etc.*, those in *-able, -er, -ile, -less* are regarded as formed from English words and retain the *u*, but those in *-ation, -ific, -ize (-ise), -ism, -ist, -ous, -ously, -ousness* drop the *u*.

British preferences:

armour  
clamour  
colour  
favour  
honour  
humour  
labour  
odour  
vapour  
vigour

armourer, armoury  
clamouring  
colourable, colourist  
favourite, favourless  
honourable  
humourless  
labourer, Labourite  
odourless  
vapourish  
vigourless

clamorous  
coloration, colorific

honorary, honorific  
humorous  
laborious  
odorous, odorific  
vaporize, vaporise  
invigorate

Agent nouns (except *saviour* and *paviour*) in British use have now generally gone over to *-or*, as *governor*.

§ 23. *-re, -er*. The British predilection for *centre, metre, theatre, etc.*, is invariable. Thus: Brit. *calibre, centring, fibre, lustre, milre, sabre, sceptre, sombre, pectre*; U. S. *caliber, centering, fiber, luster, etc.*

§ 24. *-ou-, -o-*. British usage prefers *mould, smoulder* to *mold, molt, smolder*, which are commoner in American use; likewise, British *plough*, U. S. *plow*.

§ 25. *-ce, -se*. The nouns spelled *defense, license, offense*, and *pretense* in American use are in British use more often spelled *defence, licence* (but *license*, verb), *offence*, and *pretence*; in their derivatives the British spell with *c* before suffixes beginning with a consonant, as *defenceless*, but with *s* before suffixes beginning with a vowel, as *offensive, pretension*. British usage shows only *practise* for the verb; American usage is *practice*.

§ 26. *-xion, -ction*. The British prefer *connexion, deflexion, inflexion* (derived from Latin nouns in *-xio*) to American *connection, deflection, inflection* (influenced by the corresponding verbs in *ct* and by analogy with nouns in *-tion*); they also use *reflexion* in the scientific sense (throwing back of light, heat, etc.) but generally use *reflection* in all other senses.

§ 27. *Doubling and retaining final l*. (1) In British use, words of more than one syllable ending in *l*, in forming derivatives, double the *l* before a vowel, as before *-ed, -ing, -ery, -ist, -ize (-ise)*, whereas the more consistent American usage authorizes the doubling of the final *l* only when the accent is on the final syllable. (Cf. §§ 2 & 3, above.) Thus: Brit. *apparelled, councillor, jewellery, levelled, libelled, medallist, quarrelled, totalled, travelled, woollen*; U. S. *appareled, councilor, jewelry, leveled, libeled, medalist, quarreled, totaled, traveled, woollen*; but both Brit. and U. S. *annulled* because *annul* has the accent on the final syllable. The *Oxford English Dictionary* prefers the forms with the doubled letters. Exception: Brit. *paralleled*. (2) A number of verbs accented on the final syllable have preferably a single final *l* in British usage and double final *l* in American usage in the present tense and present infinitive. Thus: Brit. *enrol, enrols, enthral, fulfil, instil*; U. S. *enroll, enrolls, etc.*, but both Brit. and U. S. *enrolled, enrolling*. Exception: Brit. *install*. (3) In British printing it is customary in forming derivatives of two-syllable verbs ending in *l*, and a few nouns ending in *ll*, to use a single *l* before a consonant. Thus: Brit. *thralldom, enrolment, instalment, skillful, wilful*; U. S. *thralldom, enrollment, installment, skillful, willful*. *Dulness* and *fulness* prevail in British printing; otherwise *ll* is retained before *-ness*.

§ 28. *Silent e retained*. The former British preferred forms *abridgement, acknowledgement, flogging, judgement, lodgement* are yielding in favor of the forms *abridgment, acknowledgment, flogging, judgment, lodgment*, long standard in the United States.

§ 29. *Sulphur* and *sulpha* are British preferences.

The chief uses of the most important punctuation marks are explained in the numbered sections below.

These directions represent preferred American usage; permissible alternatives and British differences are sometimes but not always shown below. The directions represent usage in continuous textual matter; these practices may be varied for special purposes in display printing, in tabulated matter, or in certain condensed styles of compilation.

### 1. THE PERIOD, OR FULL STOP [.]

A period is used at the end of a sentence, or any expression standing for a sentence, that is neither interrogative nor exclamatory.

Society is a wave. The wave moves onward, but the water of which it is composed does not. The same particle does not rise from the valley to the ridge.

Please close the door. Certainly.

A period is used after an abbreviation.

Reedville, Montg. Co., pop. 879; cap. or l. c.; n. masc.; 7 a.m.; 30 mins.; lg. pkg.; no. 72; 5a. 6d.; 50 m. p.h.; bks. marked o.p. [or op]; dept. bulls.; *Tech. Bull.*, mo., 50 pp.; U.S.S. *Wyoming*; Dr. and Mrs. Jas. Brown, 7 Pine St., Bath, Ohio; David Livingstone, LL.D. (b. 1813, d. 1873); raid of Apr. 18, 1942 led by Lt. Col. James H. Doolittle.

Exceptions. Abbreviations of compound names of international organizations and government agencies, official abbreviations designating equipment, and a large number of similar compound abbreviations are preferably written without periods and without spaces:

ABCD powers; ILO; UNRRA; UN; USSR; MVD; MGB; SEC; TVA; Pfc; GI; PX; PT; TD; VT fuze; IOU; ESP; IFA; MS.

NOTE 1. Many common contractions (with omission of medial letters) are preferably written as abbreviations with periods:

secy. (preferred to sec'y); advt.; mfg.; recd.; Dr. (debtor).

NOTE 2. A period is sometimes omitted by some publishers, chiefly British, from *Mr*, *Mrs*, and *Dr*; as, *Dr Brown*.

NOTE 3. No period is used after symbols of chemical elements, as *Al*, *Cu*, *U* 235.

NOTE 4. The terms *1st*, *2d*, *3d*, *8vo*, *12mo*, etc., are not abbreviations and take no period.

NOTE 5. Isolated letters of the alphabet used as designations take no period; as, T square; A 1; I beam.

A period is used before a decimal and between dollars and cents (in figures); as, 16.63 ft.; .32 cal.; \$12.17. In British use the decimal point is centered: 16.63.

The Roman numerals I, IV, xxii, etc., designating the serial number of a thing, as a page or chapter, are used with or without a period; as, 2 *Sam.* xix. 12; after names, without a period; as, George VI of England.

After titles of books and articles, after headings, and in display printing the period is omitted at the ends of lines, as well as other punctuation except an essential interrogation or exclamation mark.

An ellipsis or a suspension may be indicated by a row of spaced periods, commonly three periods (in the use of some authorities four periods) in addition to punctuation marks required at the beginning and end of the ellipsis; thus, four periods (or five) are used when the omitted words constitute a whole sentence or the last words of a sentence or when the omission falls at the end of the quotation and at the same time at the end of the main sentence.

As ellipsis marks these periods are used to indicate intentional omission of one or more words or sentences from quoted matter as nonessential to the present purpose, also to indicate illegible or unquotable words, dashes being commoner for this last purpose.

"Now that wars . . . have become far more horrible and . . . insane."

Dean Inge.

"A good deal . . . hangs on the meaning . . . of this short word."

T. S. Eliot.

We quote from Keats's *Endymion*:

Now with aught else can our souls interknit

So wingedly . . . [not the end of sentence in Keats]

Belial's well-known lines:

Sad cure! for who would lose

Though full of pain, this intellectual being. . . ?

*Paradise Lost* II. 146

Omission of one or more complete lines of poetry may be indicated by a full line of spaced periods or, much less frequently, asterisks.

Thus driven

By the bright shadow of that lovely dream,

He fled.

*Shelley.*

As suspension periods, called also suspension points, three spaced periods are used at points other than structural division points to indicate an interrupted sentence or an unfinished sentence with a suspensive effect, carrying over the emphasis toward the immediately succeeding words. Suspension periods often have a more continuative effect than the dash, which is the chief suspension point. Three spaced periods are usual except when a new sentence succeeds.

He traces S—a . . . and she sees her name Sara as well as written. I'll write to Marie . . . Or perhaps they named her Jane. The voice weakened, trailed off . . . Only silence.

Centered periods are used in many dictionaries to indicate division between syllables where division is not otherwise indicated by accent marks or hyphens.

sym/p'tom-a-to'l'o-gy; ul'tra-a-tom'ic

## 2. THE COMMA [, ]

Of all the marks of punctuation, the comma offers the most difficulty in use, and is used with the least uniformity. The most marked divergence in accepted practice lies in the use for ordinary descriptive and narrative writing of the *open* system of punctuation, that is, a minimum of pointing without causing ambiguity, and for more compact involved composition in which clearness and precision are the first requisites, of a *close* system of punctuation, providing abundant points, esp. commas. Though often, as formerly, marking rhetorical or elocutionary pauses, the comma is used primarily as a mark of separation to make clear the grouping of words, phrases, and clauses in respect to the grammatical structure of the sentence.

**Words, phrases, and clauses that are appositional, or parenthetical, or independent, as nouns of direct address, exclamations, absolute phrases, are set off by a comma or commas.**

A control plan was proposed by Bernard Baruch, elder statesman. Mr. Chairman, I yield. Pshaw, I am in no hurry. His true ambition, and a lofty one it must be counted, was to affect the course of events by affecting the course of thought. A man in black, stately and old, rose slowly.

**NOTE.** The comma is *not* used between a noun and its appositive when so closely connected in thought as to form one idea.

Edward the Confessor: the American architect Ralph Adams Cram, the aircraft carrier USS *Coral Sea*; a figure eight, the demon Kum; that expression in the groove.

**Dependent adverbial clauses preceding their principal clauses, and most initial adverbial phrases including a verbal, are set off by a comma.**

If we were always candid, woe to self-esteem! Immediately upon reaching the surface, he struck out boldly. To gain popularity, he yielded his convictions.

**NOTE 1.** A short introductory adverbial clause may need no comma after it, provided that there can be no slightest uncertainty, without a comma, where the main clause begins, as is likely to be the case where the subject of both clauses is the same.

But if peace is to be paramount it must before all things be a peace of peoples. . . . *Sir Bernard Pares.*

If we all came to talk alike there would no longer be any point in our not writing alike. . . . *T. S. Eliot.*

**NOTE 2.** When a dependent adverbial clause follows the main clause, the comma is usually omitted, except when the clause is plainly nonrestrictive, that is, adds a reason or concession introduced by *because*, *since*, *as*, *though*.

He has bought a new car, though I doubt if he can afford it.

**Adverbs and adverbial phrases that modify an entire clause or sentence rather than one word are set off by a comma.**

In the first place, he will tell you a fairy story.

Unfortunately, we shall have to decline.

It was, in fact, regarded among the faculty as a case of juvenile overenthusiasm that could, after all, be overlooked.

**Transitional phrases and conjunctive adverbs used transitionally (as *therefore*, *moreover*, *however*, *nevertheless*, *then*, *consequently*, *accordingly*) are set off by commas except in very short sentences in which they are logically close to the verb (as in, consequently I shall resign).**

The question, therefore, is still open.

On the contrary, under the rules a vote is in order.

Still, I doubt the wisdom of retrenching.

**Nonrestrictive (called also descriptive, or appositive, or additive) relative clauses and participial phrases are set off by commas.**

I visited Cardiff, which is in Wales.

Fishes, that tinkle in the deep, know no such liberty.

*Richard Lovelace.*

The senators voted assent, which was to be expected of them. Dick, feeling bitter, turned away from the scene.

**NOTE.** A restrictive (called also limiting or essential) relative clause must not be set off by a comma.

A man who beats a horse is discharged.

**In giving dates and places an added defining year or place name is set off by a comma or commas in formal style, but in lighter styles year or place name may have no following comma; in the United States a postal zone number is not set off from the name of the city, only from what follows.**

George Catlett Marshall, born December 31, 1880, at Uniontown, Pennsylvania, became Secretary of State January 21, 1947, and advanced a plan for European relief at Cambridge, Massachusetts, in June, 1947. British style: 21 January, 1951.

Apply for information to Public Information Division, Department of the Army, Washington 25, D. C.

**Exception.** Usage is evenly divided between using and not using a comma in dates when no day is given:

June, 1944 or June 1944.

**Before "of" in phrases indicating residence, position, or title, a comma is ordinarily used.**

President James Bryant Conant, of Harvard University.  
Senator Joseph Christopher O'Mahoney, of Wyoming.

**Words placed out of their natural position, as for clearness or emphasis, and elements obviously added as an afterthought or suspended for emphasis but not so distinct an interruption as to call for a dash, are ordinarily set off by a comma.**

To the wise and upright, old age brings many joys.

That the mine is rich, I concede.

Conditions for large production and ready sales continue favorable, or the present at least.

She made her husband her whole life, she idealized him, but she did not know him at all, really.

**Contrasted words and phrases are set off by a comma.**

Work, not words, is what is needed.

The greater the security, the less the yield.

**Words, phrases, and clauses of like construction used in a series, also pairs of words in a series, are separated by commas.**

The estate was left to John, Robert, and William.

Trees, trees, trees were all we could see

Old and young, rich and poor, wits and morons came out for the baseball classic.

**NOTE 1.** Before *and* or *or* introducing the final term in a series such as *a*, *b*, and *c* the comma called for by this rule is omitted by some publications in a series of single words or simple phrases. Scientific, technical, and learned periodicals and university presses in the United States show a predominance of those uniformly using this comma over those uniformly omitting it and over those sometimes using the comma and sometimes omitting it in the same publication; United States government publications quite uniformly use this comma. Journalistic, literary, and popular publications that regularly use this comma, that regularly do not use this comma, and that sometimes use and sometimes omit this comma are about equally divided. This comma is not omitted between clauses and scarcely ever between phrases.

**NOTE 2.** Two adjectives preceding a noun are not separated by a comma when the second adjective relates more closely to the noun than the first, or when the first adjective modifies the second adjective and the noun, thought of as a unit.

A vivid red tie; a brilliant military strategist; a limpid trout brook.

**NOTE 3.** *Etc.*, *or the like*, and *so on*, when terminating a series but not terminating a sentence, are preferably followed by a comma unless other sentence punctuation is called for.

Any agency promoting, selling, using, etc., these records and transcriptions is eligible.

**Independent clauses joined by a co-ordinating conjunction are separated by a comma when the clauses are closely connected in thought and are not broken up with commas (cf. § 3, below).**

He seemed inattentive, but no word escaped him.

His face showed his chagrin, for he was conscious of failure.

**NOTE.** In less formal writing, when both clauses are brief and esp. when the subject of both clauses is

the same, the comma may be omitted before the coordinating conjunction.

He will suffer but he will recover.

A short informal quotation or question or a maxim is separated from the rest of the sentence by a comma (cf. § 4, below).

"Make way for liberty," he cried.  
He asked abruptly, "Which way do you vote?"  
As Prior says, "Virtue is its own reward."

Ellipsis of a word (common to two parts of a sentence but not repeated) is indicated by a comma.

Reading maketh a full man; conference, a ready man; and writing, an exact man.

After *namely*, *viz.*, *that is*, *i.e.*, *as*, *e.g.*, etc., introducing an illustration or example, not an enumeration, a comma is used.

There are three genders in Latin: namely, masculine, feminine, and neuter.

The chief aim of censorship, namely, to eliminate inartistic pandering to base appetites, is frustrated by stupid and literal-minded censors.

Inverted names in bibliographies and reference lists are set off by a comma.

Holmes, Oliver Wendell, Jr. [or Jr.]

A proper name and an academic or honorary title, also two or more such titles in succession, are separated by a comma.

James K. Jones, M.A., Ph.D., President.

After the salutation in personal letters and after the complimentary closing in all letters the comma is the regular mark.

Dear Jack, . . . . Sincerely yours, Ted.

Two adjacent sets of figures or identical words are separated by a comma.

In the year 1984, 907 students were enrolled.  
Whatever is, is right.

Pope.

In numbers the comma normally separating thousands, millions, and other groups of three digits is omitted in dates, page numbers, and street numbers, and may properly be omitted in numbers of four digits in accordance with the practice of some of the best authorities; as, an altitude of 7525 feet; at 3600 rpm.

### 3. THE SEMICOLON [ ; ]

A semicolon is used to separate the clauses of a compound sentence:

(1) In the absence of any connective.

Make no terms; resist until the last breath.

(2) When an antithesis exists between the clauses.

A fool babbles continually; a wise man holds his tongue.  
A soft answer turneth away wrath; but grievous words stir up anger.

(3) When there is a marked change in thought.

You must practice, practice, practice day after day; else you will retrograde and become mediocre.

(4) Where the connective is one of the conjunctive adverbs *accordingly*, *also*, *consequently*, *furthermore*, *hence*, *however*, *indeed*, *moreover*, *nevertheless*, *otherwise*, *so*, *still*, *then*, *therefore*, *thus*, *yet*.

You recommend this man; therefore I will give him a trial.  
He is a graduate of Oxford; hence we expect a learned discussion.

(5) When the clauses themselves contain commas.

The seasons come and go, and the years pass on; but love abides.

A semicolon is used to separate the members of a series of clauses or phrases introduced by a colon.

The yield was 1925, 600 bbls.; 1935, 886 bbls.

A semicolon (so also a colon, a dash, or a comma) is used before *namely*, *to wit*, *that is*, *i.e.*, *viz.*, *e.g.*, *as*, *for instance*, *for example*, when introducing an illustrative example or explanation or an enumeration of particulars not felt as parenthetical (cf. § 2, above).

The Navy is the first line of defense; that is to say, it is not until the Navy has been beaten that our shores can be invaded.

'Small' is overworked as well as 'great'; for example: in "a small particle of gold" 'small' adds nothing to the meaning.

A semicolon is used in lists of names with addresses, titles, or figures, where a comma alone would not separate items or references clearly.

Deut. 3:1-10; 4:4-36.

### 4. THE COLON [ : ]

A colon is used to introduce a formal direct quotation or direct question.

He cited this line from Pope:

When Ajax strives some rock's vast weight to throw.

A colon is used to introduce a formal enumeration of particulars, regularly after "the following" (but disapproved by some after "are"), regularly to introduce a numbered series, less commonly before a short informal series; and inversely, in formal context, before a final clause summarizing the preceding series (cf. the dash for similar service in less formal context, § 7, below).

His favorite themes may be classified under three heads: the folly of pacifism, public waste, and the spread of communism.

To make an early prognosis of possible dissension; to diagnose the potential crisis; to administer a drastic purge: these steps are imperative for a dictator.

A colon is used to set off an appositive clause or phrase that constitutes a restatement of the preceding clause, with or without *to wit*, *that is*, or the like.

His recipe for health is a program of simple living: he prescribes only plain food, abundant exercise, and bodily exposure to the sun.

And here Machiavellism must live or die: there is no alternative offered.

But in its best and fullest sense this kind of intellectuality must encompass the whole poem: it must fuse the poem into a tight logical structure.

Wallace C. Brown.

A colon is used after the salutation in a business letter or an address.

Sirs: Mr. Chairman, Ladies, and Gentlemen: Mr. President:

A colon is used to separate the parts of numerical ratios.

The ratios 12:19 and  $x:57$ .

A proportion, commonly written  $12:19 = x:57$  or  $12:19 :: x:57$ , is often written by scientists  $12/19 = x/57$ .

A colon is used between Biblical chapter and verse numbers, and between volume and page numbers, in references using Arabic numerals and between place of publication and publisher's name in bibliographical references and footnotes. These uses of the colon are paralleled by equally common use of the period. The comma is commoner in styles using Roman numerals to indicate volume number of periodicals and in styles using the abbreviations "chap." or "v." with the numerals. See Bibliographies, page 1196.

1 Corinthians 13:4-13

J. Am. Chem. Soc. 72:127 (1950).

Brock, Werner. *An Introduction to Contemporary German Philosophy*. Cambridge: Cambridge University Press, 1947.

A centered colon is used to separate corresponding words apposed in pairs or sets for comparison, for example, rhyming words or words linguistically compared.

Seventeenth-century rhymes include prayer: afar and brass: was: as.

We learn that the stature in the two sexes shows very nearly the same female: male proportions.

Examples in Gothic of a feminine abstract from an o/a adjective are *managai: managa, hauhei: hauha, audagai: audaga*.

A centered colon is regularly used between hours and minutes and seconds in representing twelve-hour clock time, but in British practice and frequently in American publications a period is used; in charts and timetables the hours and minutes are usually spaced without punctuation mark; in representing twenty-four-hour clock time hours and minutes are regularly set without spacing or punctuation mark.

2:31:30 p.m.

When it is 9:32 p.m. by the city-hall clock, it is 2132 aboard a submarine in the harbor.

### 5. THE EXCLAMATION POINT [ ! ]

An exclamation point is used after an ejaculation, and after any phrase or sentence of wish, command, irony, or the like to indicate forceful utterance or strong feeling.

Egad! I had no such intention.

Oh that those lips had speech!

Is the writer to become the slave of the publishers!

"Stop! Class dismissed!" he bit off the words.

## 6. THE INTERROGATION POINT [?]

An interrogation point is used at the end of a direct question, even if in declarative form.

What after that? You say you will persist?  
How can he expect reinstatement? now or later? — with a record of insubordination, obstruction, and insolence marked down against him. An Oxford degree — or was it Cambridge? — lured him.

NOTE 1. A request put for courtesy's sake in interrogative form takes a period.

Will you kindly fill out and return this questionnaire.

NOTE 2. Used as a terminal mark of a direct quotation, the interrogation point, as well as the exclamation point, usually obviates need for comma or period (other than ellipsis or suspension periods).

After he had affixed the title "Why the comma?" he slipped away.

An interrogation point, enclosed in parentheses, is used after a word, phrase, or date to indicate uncertainty of its accuracy or conjecture or irony, or to mark a gap in available information.

Omar Khayyám, Persian poet (?-1123?).

The *Ophir* of the Bible, rich in gold, was Arabia (?).

He offered to sell me a bag of real (?) pearls.

## 7. THE DASH [—]

A dash is used to mark an abrupt suspension of the sense, an unexpected turn of the thought, or a sudden change in the construction; also a faltering in speech.

Carranza's answer was — obey.

If you will listen, I will explain — but perhaps you do not care to hear.

To revert to sensuously insistent jungle rhythms with smashing or stinging discords — that is what jazz offered a war-weary generation. The past has been a failure; the present — what can it matter in the light of the perfecting future? *Lionel Trilling.*

A self-hunting dog is — a canine — that is — a dog of peculiar traits.

A dash is used to introduce a repetitive phrase, a summing-up word or words like *namely*, or an afterthought, with more or less emphasis (cf. § 3, above, for use of a semicolon before words like *namely*).

I will never — never, I say — agree to this iniquitous proposal.

Breadth of culture, practicality, frankness, astuteness, inflexibility, leniency — all are requisites of a teacher.

Sports develop two valuable traits — viz., quick decision and self-control.

He is recommended merely as a graduate of high rank — as if scholarly achievement gave assurance of teaching ability.

Dashes are used in pairs to set off interpolations when the matter is brief and calls for some emphasis, that is, when it is subordinate and incidental to a less degree than is indicated by parentheses.

I saw her — my pulse even now stops at the thought — in the path of the careening automobile.

Dashes enclose parenthetical matter in text that is itself inside brackets inside parentheses.

A dash (en dash) is used as the equivalent of *to and including* between extreme dates or numbers, also often in compounding capitalized two-word names.

Pages 40-89; the decade 1941-1950; a New York-Lisbon plane.

A dash (usually a two-em dash) is used to indicate ellipsis of a word or letters in a word.

Yelling — loudly; Mr. M — of New York; the d — l.

## 8. PARENTHESES, OR CURVES [()]

Parentheses, or marks of parenthesis, are used to set off a word, phrase, or sentence which is inserted by way of comment, explanation, translation, etc., in a sentence but which is structurally independent of it.

Know, then, this truth (enough for man to know): Virtue alone is happiness below.

We were now nearing our destination (after five days on the river), and our spirits rose.

*Nil desperandum* (Never despair)!

## 9. BRACKETS [{}]

Brackets are used to set off inserted matter as extraneous or merely incidental to the context, esp. editorial interpolations and other comments not by the author of the text.

"He is just as cheerful as when you was [were] here."

"The ensuing winter [1789] promised to be a turning point."

Gypsum and barites are mentioned as sulfates [etc].

A fly is said to be a two-winged dipterous [does that make four wings?] insect.

Brackets are used for parentheses within parentheses.

Bowman Act (22 Stat. L., ch. 4, § [or sec.] 4, p. 80).

## 10. QUOTATION MARKS [“”]

Quotation marks are used to enclose all direct quotations, that is, quotations in which the exact phraseology of another or of a text is directly cited.

"When I am dead," said one of the keenest of modern minds, one of the greatest of modern poets, "lay a sword on my coffin, for I was a soldier in the war for the liberation of humanity."

NOTE 1. In all quotations, excepting extracts from plays, quotation marks are put at the beginning of every paragraph occurring within the quotation, in addition to those at the beginning and at the end of the extract.

NOTE 2. No quotation marks are used when the quoted matter is set in smaller type or in paragraphs indented on both sides.

NOTE 3. No quotation marks are used to enclose oft-quoted familiar phrases, such as *to err is human*.

Single quotation marks are used to indicate a quotation within a quotation and are preferred by some, esp. in British usage, to indicate quoted matter, in which case double quotation marks are used for a quotation within a quotation.

The witness said: "I distinctly heard him say, 'Don't be late'; and then I heard the door close."

Quotation marks are used ordinarily to enclose titles of short plays and poems, paintings, lectures, articles, and parts of books; whereas titles of whole books, periodicals, and newspapers are in present usage italicized in context.

He read a paper on "The Influence of Poe in European Literature."

The "To be or not to be" soliloquy. The title story "Sold Out."

Quotation marks, often single quotation marks, are used to enclose technical terms expected to be unfamiliar to the reader or words used in an unusual or ironical or humorous sense; or coined words, colloquialisms, trade or shop jargon, or the like, for which the writer offers a slight apology. Quotation marks are often equivalent to affixing *so-called* to a term.

The plates of copper are hung by "corrosion hooks" in the acid.

This venture is plainly a "wildcat" intended to prey upon the unwary.

We've had enough of your "unshrinkable" shirts.

His request for a "freeze" order on construction.

Compensated by exports to the U.S.A. and by "invisible" exports.

The exterior "overhang" of the living-room window.

Quotation marks are often used to enclose the names of ships or words used as words, though italic type for these uses is generally preferred.

Lost with the "Titanic," which sank April 15, 1912.

It is well to use a dash before and a colon after the word "namely" when introducing a full clause.

Quotation marks with other punctuation marks.

(1) Terminal quotation marks are accompanied by only one other mark, whether the quotation and the whole sentence call for the same mark repeated or different marks.

Did he keep asking you, "What is your number?"

We exclaimed with Wat Tyler, "When Adam delved and Eve span, who was then the gentleman?"

Just as he shouted, "I will not!" he slammed the door.

Is this the acknowledgment I get, to have you bellow "Barefaced Philistine! Sniveling time-serving extortionist!"

(2) A period or comma is regularly placed inside closing quotation marks whether logically belonging to the quoted matter or to the whole sentence, according to the predominant American practice.

We accept a nicely unified and definable compartment labeled "Man."

The first principle of existentialism, "Existence is prior to essence," is easy to remember.

NOTE. A logical distinction is often applied in printing U. S. Congressional matter and in the British

and Canadian style of punctuation, and advocated by some American writers, whereby a period or comma is placed outside the quotation marks when it belongs not to the quotation but to the whole sentence or the clause containing the quotation.

This act may be cited as the "Army-Navy Medical Services Corps Act of 1947".

The Prime Minister, after reporting the negotiations, declared resolutely, "Our only course is to resist aggression".

Replying with the one word "Bunk", he subsided.

(3) A colon or semicolon is regularly placed outside quotation marks. A terminal colon or semicolon of quoted matter incorporated into a sentence regularly gives place to appropriate sentence punctuation.

"Fame is proof that people are gullible"; with this quotation from Emerson he retired in silence.

"Don't be nervous," we urged; "you can beat him." [Compare the original of the quotation: Don't be nervous; you can beat him.]

Exception. A colon or semicolon may be placed inside the quotation marks in exceptional cases in which it belongs inseparably to the quotation, as in:

"Sir:" is the salutation used in letters to the editor.

(4) An interrogation or exclamation point is regularly placed inside or outside the quotation marks according as it belongs to the quoted matter or to the whole sentence or clause including the quotation.

Can you forget his angry exit after shouting "Include me out?"  
"And what do you think of 'The Wings of Death'?" Mrs. Roby abruptly asked her.  
Edith Wharton.

## 11. THE APOSTROPHIC ['']

The possessive case of singular nouns and plural nouns not ending in an *s* or *z* sound is formed by adding an apostrophe and *s*.

A book's chances of success; carpenter's; dog's; motorist's; owl's; president's; at his wit's end; fish's tail; garage's responsibility; Senator Edge's constituency; the church's philosophy; men's; oxen's; children's; Des Moines's press; Descartes's philosophy; Dumas's novels; Delacroix's painting.

The possessive of singular common and proper nouns of one syllable ending in an *s* or *z* sound is formed by adding an apostrophe and *s*.

fuzz's  
Brooks's;

NOTE. An apostrophe and *s* are usually added to a noun to form the possessive case. This form is a survival of the *es* ending in Old and Middle English, from which the vowel sound has disappeared in Modern English except in nouns ending in an *s* or *z* sound. In early Modern English this *s* or *z* sound was often dropped from the possessive of nouns ending in an *s* or *z* sound, both in speaking and writing, leaving only the apostrophe in writing, as is evident in certain idioms and in poetry. Since the middle of the nineteenth century, however, the form with apostrophe and *s* (pron. -*ēz* or -*l<sub>z</sub>*) has been generally adopted for the possessives in which the extra syllable is not awkward to pronounce in the context.

The possessive of singular common and proper nouns of two or more syllables ending in an *s* or *z* sound and having an accent (primary or secondary) on the final syllable is formed by adding an apostrophe and *s*.

Our advance's speed; the marquise's jewels; a showcase's protection; a strongbox's weight; a pickax's imprint; the enterprise's success; Laplace's; Alphonse's; Hortense's; Berlioz's.

The possessive of singular common nouns and modern proper nouns of more than one syllable that end in an *s* or *z* sound and have no accent (primary or secondary) on the final syllable may be formed by adding an apostrophe and *s* or an apostrophe only according as the *s* is intended by the author to be pronounced or omitted. Eminent literary publications show consistency in the use of the apostrophe and *s*, scientific and technical publications in the use of the apostrophe alone. The form with apostrophe and *s* is appropriate as long as it is readily pronounceable in

the context. An apostrophe alone is added by some writers and speakers when an *s* or *z* sound closely precedes that in the final syllable or when the immediately following word has an initial *s* or *z* sound. The antipathy to several successive sibilants often set up as a reason for omitting the *s* in the possessive is not evident when the same sequence of sounds includes the verb *is*, pronounced the same as 's (thus: an *octopus's* snaky appearance; an *octopus is snaky in appearance*). The reluctance to duplicate a final -*es* or -*is* sound by adding apostrophe and *s* is a genuine reason for using the apostrophe only (thus: Bill *Jeffries's* sister). A practical reason for using apostrophe and *s* is that the shorter form with apostrophe only is ambiguous (*Roberts's* being indistinguishable in pronunciation from *Robert's*, *Paris's* sight similar to *parasite's*).

An audience's (or audience') reaction; an acquaintance's (or acquaintance') sickness; a governess's (or governess') fault; an heiress's (or heiress') estate; whether you drink at your host's or hostess's; the postmistress's (or postmistress's) zeal; out of the waitress's (or waitress's) sight; the business's (or business's) status; the axis's (or axis's) ends; the Foreign Office's traditional fears; the service's age limit; arthritis's (or arthritis's) true cause; the phoenix's (or phoenix's) nest; the universe's galaxy population.

Dr. Adams's (or Adams') services; Ben Andrews's (or Andrews') daughter; Chambers's (or Chambers') Dickens's (or Dickens's); Alice's (rarely Alice's); Robert Service's (or Service's) verse; Horace's (sometimes Horace's); Harris's (or Harris's); Felix's (or Felix's); Furness's (or Furness's); Dos Passos's (or Passos's); Cervantes's (or Cervantes's); Columbus's (or Columbus's); Linnaeus's (or Linnaeus's); Stettinius's (or Stettinius's); Col. Ephraim Williams's (or Williams's).

NOTE. Before the word *sake* the possessive of such nouns formed by the apostrophe without an *s* is correct in set expressions and closely analogous expressions.

For goodness's sake; for conscience's sake; for convenience's sake; for righteousness's sake; violence for violence's sake.

Preferred: For appearance's sake; for science's sake.

The possessive of ancient classical and Biblical proper names and some foreign proper names ending in an *s* or *z* sound may be formed, as often in poetry and usually in classical works, by an apostrophe without an *s*, though some authorities for present use prefer the apostrophe and *s* when readily pronounceable.

(1) Such names of one syllable are better spelled in the possessive, like modern proper names, with an apostrophe and *s*.

Zeus's son; Mars's help [but Mars's Hill].

(2) Such names of two or more syllables having the accent on the penult more often take an apostrophe without an *s*.

Brutus's (or Brutus's); Phoebe's (or Phoebe's); St. Agnes's (or St. Agnes's); Aeneas's (or Aeneas's); Aquinas's (or Aquinas's); Catullus's (or Catullus's); Epicurus's (or Epicurus's); Menelaus's (or Menelaus's); Odysseus's (or Odysseus's).

(3) Such names of two or more syllables having the accent on the penult and ending in -*es* (pron. -*ēz*) take the apostrophe without *s*.

Achilles's; Ceres's; Ulysses's; Xerxes's; Archimedes's.

(4) Such names of three or more syllables having the accent on the antepenult may take the apostrophe and *s* or the apostrophe only; those ending in -*es* (pron. -*ēz*) usually take the apostrophe only.

Pythagoras's (or Pythagoras's); Aeschylus's (or Aeschylus's); Democritus's (or Democritus's); Herodotus's (or Herodotus's); Oedipus's (or Oedipus's); Tacitus's (or Tacitus's); Theophrastus's (or Theophrastus's); Aristophanes's (or Aristophanes's); Diogenes's (or Diogenes's); Euripides's (or Euripides's); Hercules's (or Hercules's); Miltiades's (or Miltiades's); Pericles's (or Pericles's); Socrates's (or Socrates's); Sophocles's (or Sophocles's); Themistocles's (or Themistocles's); Thucydides's (or Thucydides's).

(5) More familiar classical names of this class are usually spelled in the possessive like modern proper names, that is, preferably with apostrophe and *s* as long as the extra syllable is readily pronounceable (see paragraphs above).

Cyrus's; Venus's; Judas's; Marcus's.  
But: Moses's; Jesus's.

The possessive of all plurals ending in an *s* or *z* sound is formed by adding the apostrophe only, including a number of French plurals ending in -*x* that are pronounced in English with a final *z* sound.

Consumers' resistance; foxes' holes; a bumblebees' nest; the Henrys' invitation; the Joneses' doing; the two chateaux' destruction; the tableaux' effect; Parquhar's "The Beau's Stratagem."  
Exceptions: geese's; lice's; mice's.

The possessive of titles, firm names, initials, abbreviations, acronyms, and the like, may be formed by adding apostrophe and s.

Charles I's; the Edison Co.'s; RFC's; CIO's; C. D. K. Jr.'s; UNRRA's; DDT's.

The possessive of compound nouns is formed as the possessive of the concluding noun would be if it were standing alone; the possessive of a compound not concluding in a noun, by an apostrophe with an s.

Cutpurse's; scapegrallows'; sons-in-law's; passers-by's; the Adjutant General's Department.

The possessive of two or more nouns in apposition or in the same construction is indicated by an apostrophe with an s added to the last noun.

The Representative from Utah's vote.  
In our representative Mr. Burns's car.  
Bring the matter to Mr. Robert Burns, our Chicago representative's attention.

At Smith's, the stationer in K Street.  
At Smith, the stationer's in K Street.  
At Smith the stationer's office.

The possessive form of time words is used in idiomatic expressions of duration, in the singular or plural form according to the context.

A week's delay; a two hours' ride; thirty days' grace.

NOTE. A nonpossessive form with hyphen is likewise proper.

A two-week delay; a two-hour ride; (infrequently) a two-hours ride.

The possessive form is used in a number of idiomatic expressions of measure, rate, or worth.

A boat's length; at arm's length; a hand's breadth; a stone's throw; at two streets' remove; at a snail's pace; a dollar's worth; five cents' worth.

The apostrophe with an added s is used with each of two or more possessives joined by a co-ordinate conjunction, when referring to separate possessions

and with only the last possessive when referring to joint ownership.

George's and William's answers are equally informative (each answering independently). The centuries of her family's and England's history.

From papa and mamma's bedroom came the sound of grief.  
It is George and William's turn to row (together).

No apostrophe is used in the possessive pronouns *his, hers, its, ours, yours, theirs*.

The apostrophe is often omitted in titles and geographic names.

The form of the corporate title or authorized or official title is to be followed.

Citizens Bank; The Authors Club; St. Anthony's Retreat; Smiths Market; Harpers Ferry; Eastern State Teachers College; Joyce's *Finnegans Wake*.

An apostrophe followed by a *d* is used to form the past and past participle of arbitrarily coined verbs.

Thee'd; O.K.'d; K.O.'d; L.L.D.'d; Influenza'd.

The apostrophe is commonly used before *s* in the plurals of exclamations, imperatives, conjunctions, adverbs, numbers, and abbreviations used substantively but may be omitted as long as no ambiguity is likely to result. Cf. *Orthography* § 12, last paragraph.

The yes's (better yeases) equal the no's (better noes); the dos and don'ts of poultry raising; heavy with ifs and buts; told of whys and hows; arranged in twos and threes; a battery of 88s (or 88's); IOUs (or I.O.U.'s); a guard of MPs (or M.P.'s).

An apostrophe followed by an *s* is used to form the plurals of figures and letters and signs, and of words when used as words only, but forms omitting the apostrophe are gaining ground. Cf. *Orthography* § 12, last paragraph.

A million is expressed by 1 followed by six 0's.

The sentence has three *and's* in it. A's, B's. Two Cs and a D.

The omission of a letter or letters from a word or of one or more figures from a date is marked by an inserted apostrophe.

Don't; I've; he's; who'd; 'tis; 'gainst; o'er; o'clock; you'll; you're; I'd; the class of '40; aas'n.

## COMPOUNDS AND HYPHENATION

Though authorities differ widely as to which compounds are to be written solid, which separate, and which with a hyphen, the following generalizations represent the trend of the best usage in regard to the use of the hyphen in compounding. Forms prescribed below are preferred for general use; in some categories separate-word forms or hyphenated forms are retained in conservative or formal style, while solid forms have been adopted in technical style.

Compounds are usually solid when the first element is a prefix (*unconscious*) or a combining form (*telegraph*), or when the last element is a suffix (*slowly*) or a combining form (*geology*).

Compounds are hyphenated:

(1) When the second element is capitalized or thought of as representing something official or institutional.

*Russo-Finnish; pro-United Nations; ex-governor.*

(2) When consisting of impromptu formations, reduplicating terms, or temporary combinations.

*Clickety-clack; clomp-clomp; a kind of caught-in-the-act look.*

(3) When based upon a syntactical relation.

*All-inclusive; tax-exempt; fire-eater; fire-resistant; flea-bitten; God-descended; hate-inspired; heat-treat; Latin-derived.*

(4) When containing a prepositional phrase.

*Behind-the-scenes agreements; a between-the-acts intermission; a heart-to-heart talk; Jack-in-the-pulpit; mother-in-law; an off-center axis; off-white satin; out-of-door exercise; over-the-counter stocks; up-to-dately recorded; up-to-the-minute information.*

(5) When the first element is self-.

*Self-love; self-determination; self-inflicted; self-starter.*

(6) To distinguish a compound from a word of different meaning that would be otherwise identical.

*Re-creation* (cf. recreation); *re-form* (cf. reform).

(7) When the same letter occurs three times in succession.

*Bell-like; skill-less; cross-stitch.*

(8) When otherwise a vowel would be confusingly doubled in combination.

*Anti-imperialist; co-owner; intra-atomic; pro-empt; re-enter; semi-independent; you-uns.*

Exceptions: *Cooperate* and *coordinate* and their derivatives are often written thus as solid forms, because of their great frequency and familiarity.

(9) To avoid an ambiguous situation, as when two adjacent vowels might be mistaken for a diphthong:

*Cave-in; drive-in; flare-up; freeze-out; mop-up; tie-in.*

Exceptions: Compounds, esp. scientific nouns and adjectives, in which combining forms (as well as prefixes) constitute the first element, are usually written solid (*autointoxication, frontoauricular, genitourinary, microorganism, nasoorbital, paleoethnology, zoid*).

## COMPOUND NOUNS

Compound nouns are usually solid (*blackboard*) or separate (*school year*). They have often become solid when the meaning is specialized or figurative and when the accent is partly or altogether lost on the second element, esp. when the first element is of one or two syllables and the second is of one syllable.

*Beekeeper; blackbird; choirmaster; mineowner; plateholder; playwright; summertime; voltmeter.*

Certain words, mostly of one syllable (*ache, bans, berry, board, book, boy, bush, craft, fish, flower, foot, head, hound, house, man, mouth, room, shop, weed, woman, wood, work, wort, yard*), form solid compounds if the meaning is specific.

*Teethache; bonberry; cardboard; notebook; bellboy; woodcraft; blackfish; sunflower; arrowhead; deerhound; workman; bathroom; bindweed; needlewoman; handwork; shipyard.*

Compound nouns formed from a one-syllabled verb and a short adverb are mostly solid except when an ambiguous situation would result.

*Blowout; breakup; hangover; hideaway; smashup.* But: *sit-in*.

The following classes of compound nouns are hyphenated:

(1) Compound agent nouns formed by adding *-er* to a verb, plus an adverb.

*Bucker-up; cutter-off; hanger-on; listener-in; rubber-down; tapper-out.*

(2) Compound nouns naming the same person or thing under two aspects.

*Actor-manager; city-state; man-brute; poet-statesman.*

(3) Compound nouns consisting of three or more words, esp. of a noun plus a prepositional phrase.

*Jack-in-the-pulpit; mother-in-law; will-o'-the-wisp; forget-me-not; give-and-take; merry-go-round.*

Exceptions: Noun expressions containing the phrases *at arms, at large, in chief, or of* phrases are usually not hyphenated; thus, *attorney at law, commander in chief, sergeant at arms, chief of staff, bill of fare.* But: *man-of-war*.

(4) Compound nouns consisting of a verb plus a noun (or pronoun), or a verb plus a verb.

*Cure-all; has-been; know-nothing; make-believe.*

(5) Compound nouns naming a technical unit of measurement ending in *year, day, hour, minute, second, mile, foot, inch, pound, ton.*

*Light-year; foot-pound; degree-day.*

(6) Most compound nouns consisting of a possessive case and a noun, naming usually a flower or plant, or having a fanciful meaning.

*Adam's-tongue; bull's-eye; cat's-paw; mare's-tail.*

Exceptions: *cockscorn, coltsfoot, monkshood, wolfebane.*

NOTE. Terms consisting of a capital letter and a noun are not hyphenated except when used as attributive adjectives (*G string; I beam; L head; T rail, T square; X ray; Y chromosome*).

But: *L-head cylinder; X-ray tube.*

## COMPOUND ADJECTIVES

Most compound adjectives consisting of two or more words are hyphenated, though in several classes particular adjectives having specialized or figurative meaning of long standing are written as solid words. Thus: *boneheaded, shamefaced, tightfisted, crackbrained, underwitted, stouthearted, backbreaking, faultfinding, laborsaving, overbearing, slowgoing, bloodthirsty, headstrong,* and most compounds ending in *-born, -bred, -proof, -sick, -tight, or -worthy*.

The following classes are regularly hyphenated in both attributive and predicative uses.

(1) An adjective or noun prefixed to a noun plus the suffix *-ed*.

*Bull-necked; double-faced; full-bodied; saber-toothed.*

(2) An adjective plus a participle.

*Atrocious-smelling; sinister-looking; dark-colored; quiet-spoken.*

(3) A noun standing as object of a following present participle.

*Fun-loving boys; normal boys are fun-loving; a spectacle awe-inspiring to the multitude; breath-taking; health-giving; soul-stirring; heart-rending.*

(4) Compound numerals and fractions used as adjectives.

*Twenty-one persons; until he was twenty-one; a two-thirds majority.*

But: *Two thirds* of those present were Scandinavian, the rest German; a tolerance of *two thousandths*.

The following classes are regularly hyphenated in at-

tributive use but in predicative use are hyphenated (rather than written as separate words) only when ambiguity as to their syntactical relation would result from omission of the hyphen.

(1) A noun plus a prepositional phrase.

*A face-to-face interview; door-to-door calls; run-of-the-mill performers; make the canvas door to door; these novels seem only run of the mill.*

(2) The first word modifying the second.

*Bluish-gray eyes; dark-green shadows; quick-fire guns; secondary-school education; well-made tools; wide-open door; the sky was dark blue; find the door wide open.*

(3) An adverb not ending in *-ly* plus a present or past participle.

*A slow-growing shrub; a shrub usually slow-growing in this climate; hard-working; far-flung; fast-swim; the breach is ever widening; a remark often repeated.*

But: An adverb in *-ly* used with a present or past participle is regularly written as a separate word (a quietly spoken warning) because its syntactical relation is evident without a hyphen.

(4) A noun in some syntactical relation to an adjective or to a present or past participle. There is a recognizable trend toward hyphenating compounds of this class in predicative uses as well as attributive uses.

*A pitch-black room; a stem-winding watch; terror-crazed occupants; he found the room pitch black; whether the mechanism is hand or spring winding; mines chiefly British owned.*

Exception: Compound adjectives consisting of a two-word proper noun or adjective are not hyphenated.

*New Jersey rivers; New Testament period; Old French words.*

## COMPOUND ADVERBS

Compound adverbs consisting of two or more words are mostly hyphenated, esp. newly formed compounds.

*Go cross-lots; buy a house dirt-cheap; cut end-grain; sing full-throatedly; manipulate left-handedly; scratched skin-deep; prices rose sky-high; played only so-so.*

NOTE 1. Some compound adverbs are written solid, such as those compounds established in older English and many in common use consisting of two monosyllables, one of which is thought of as a prefix or suffix.

*Henceforth; outdoors; thence; throughout; whereas; downtown; inshore; nearby; offhand; overnight; upstate.*

NOTE 2. Adverbial combinations of words whose syntax in any context is evident on first reading are preferably not hyphenated (as, situated *hard by*; move *close in*; turn *inside out*; go *out of date*).

## COMPOUND VERBS

Compound verbs formed with prefixes are mostly solid.

*Coezient; defrost; overhang; prefabricate; recap; sublet; underestimate.*

Compound verbs formed from an adjective plus a noun or an adjective plus a verb are mostly hyphenated.

*Cold-chisel; double-tongue; dry-clean; quick-freeze; still-hunt.*

## THE DIVISION HYPHEN

The hyphen is used in printing and writing as a mark of separation or division chiefly as follows:

(1) At the end of a line which terminates with a syllable of a word, the remainder of which is carried to the next line.

*mill* [end of line] *stone; pa- sion; fa- ther; liv- id.*

(2) Between letters or syllables repeated to give the effect of stuttering, sobbing, or halting expression.

*S-s-sammy; ah-ah-ah.*

(3) With suspensive effect.

*A six- or eight-cylindered motor; in ten- and twenty-dollar bills.*

(4) To indicate a word as spelled out letter by letter.

*p-r-o-b-a-b-l-y*

## THE USE OF CAPITALS

The essential distinction in the use of capitals and lower-case letters beginning words lies in the particularizing or individualizing significance of capitals as against the generic or generalizing significance of non-capitals. A capital is used with all proper nouns, that is, nouns that distinguish some individual person, place, or thing from others of the same class, and with all proper adjectives, that is, adjectives that take their descriptive meaning from what is characteristic of the person, place, or thing named by the noun. Most proper nouns and proper adjectives used not in the primary signification but in a derived, secondary, or special sense (as *cashmere*, the fabric; *utopia*, *utopian*) are written without capitalization.

The directions below represent normal practice in continuous textual matter; the practice may be varied for special reasons in display printing, in tabular matter, or in certain condensed styles of compilation.

A capital is used as the initial letter or letters of:

(1) The first word of a sentence or an expression standing for a sentence, a direct formal quotation, or a line of verse; also, a direct question within a sentence even though not quoted.

You urge in vain. Recant my views? Never!  
Our fears in Banquo  
Stick deep; and in his royalty of nature  
Reigns that which would be feared. *Shak.*

The eighteenth century asked of any action, Is it decorous?

(2) Proper nouns, words used as proper nouns, and (generally) their derivatives used in the primary sense.

George, Georgian; Spain, Spanish; Americanize, Americanism; Californian; Roman customs. But: roman type.

(3) Names of peoples, races, tribes, and languages.

Mongolian; Phoenician; Viet-Nameese; Iroquois; Indo-European; Latin; Mayan.

(4) Titles of honor, academic and religious titles, and professional and business titles used with proper nouns; also, epithets used in place of proper nouns.

Queen Mary, Dean Inge, His Eminence the Cardinal Archbishop of New York, Iron Chancellor; Citizen King; Old Hickory; the Hoosier Poet; All America team.

Associate Professor E. F. Brown, Emeritus; Chief Engineer J. L. Coe; David Williams, Chairman of the Labor Board; Treasurer C. D. Smith of the Union Trust Company.

(5) Official and government titles and titles of nobility, as President, Governor, Senator, Speaker of the House, Secretary for Defense, Postmaster General, Prime Minister, Prince of Wales, when accompanying a proper name or used in direct address; as, John Doe, U. S. Minister to Spain; Secretary Trygve Lie; His Honor the Mayor; Mr. President; Your Honor. Also, often, the adjective *Presidential* when used specifically of the president of the United States.

(6) Official names of national or international governmental bodies or documents, also sometimes short forms of these used specifically or with a capitalized name, but not usually any short forms or modified forms of them in general reference:

The Constitution of the United States; the Eightieth Congress; the Federal Reserve System; Federal Reserve banks; the Federal Communications Commission; the National Advisory Committee for Aeronautics; Charter of the United Nations (or, the Charter); the Security Council (or, the Council); the International Bank.

But: according to the constitution; administration policies; federal agency.

(7) Nouns and often also adjectives that refer to the Deity; and pronouns and pronominal adjectives referring to the Deity when not closely preceding or following their antecedent naming Deity.

idence;

Tru

and his beneficence.

The Almighty has his own purposes.

So lenely 'twas, that God himself

Scarce seemed there to be.

Lamb of God, who takest away the sins of the world, only in thy

grace shall my soul be healed.

Abraham Lincoln.

Colorado.

Katharine Anne Porter.

NOTE 1. Many writers prefer to capitalize possessive adjectives immediately preceding a name of Deity (as, the Virgin and Her Son).

NOTE 2. Many writers capitalize pronouns and pronominal adjectives referring to Deity even when close to the antecedent naming Deity and thus not needing capitalization for clarity of reference.

Teach me, my God and King,  
In all things Thee to see.  
God's in His heaven—  
All's right with the world.

George Herbert.

Robert Browning.

(8) Names for the Bible or parts, versions, or editions of it, and names of other sacred books, and derivative adjectives when the adjective refers explicitly to the Bible, Scriptures, Talmud, etc. (otherwise not capitalized).

Bible; Talmud, Talmudic; Vedas; the Scriptures; Old Testament; Pentateuch; Apocrypha; Gospel of Mark; Apocalypse.

(9) Names of creeds and confessions, religious denominations, monastic orders, and Church when used to designate a specific body or edifice.

Apostles' Creed; the Thirty-nine Articles of the Church of England; Hunt Memorial Church.

(10) Holidays and holydays generally; also, the months of the year and the days of the week.

Fourth of July; Good Friday; Yom Kippur; Labor Day; January.

(11) Names of congresses, councils, and expositions; of organizations and institutions; of governmental departments; of political parties [but not the word *party*].

The Yalta Conference; the Security Council of the United Nations; Louisiana Purchase Exposition; the Progressive party; the Smithsonian Institution; Bureau of Engraving and Printing; Congress of Industrial Organizations; the Olympic Games.

(12) Names of courts of law.

Circuit Court of the United States for the 2d Circuit (but the circuit court); the Michigan Court of Appeals (but the state court of appeals).

(13) Names of treaties, laws, acts, important events, historical epochs, literary periods, etc.

Versailles Treaty; the Crusades; Middle Ages; the Enlightenment.

(14) Names of geological eras, periods, epochs, strata, etc., and names of prehistoric divisions.

Carboniferous; Upper Jurassic; Age of Reptiles; Neolithic age.

(15) Names of genera but not of species, in binomial scientific names in zoology and botany.

The marine worm *Nereis diversicolor*; *Spiraea latifolia*.

(16) New Latin names of classes, families, and all other groups above genera, in zoology and botany, but not derivative adjectives or nouns.

Gastropoda, but gastropod; Ranunculaceae, but ranunculaceous.

(17) Names of planets, constellations, asteroids, stars, and groups of stars, but not sun, earth, and moon unless listed with other astronomical names.

(18) Generic geographical terms that form an integral part of a specific proper name, such as bay, borough, colony, continent, county, district, hemisphere, island, lake, mountain, ocean, pass, peninsula, river, sea; and likewise avenue, boulevard, bridge, park, road, square, street.

Cook County, Illinois; the Japan Current; the Northern Hemisphere; the Marquesas Islands; the Indian Ocean; the Red Sea; Park Drive. But: the Atlantic coast of Labrador; Pacific islands; Swiss mountains; the Ohio River valley; the Continent or continent (the mainland of Europe).

NOTE 1. In some publications, such a generic term may be written without capitalization even when following a specific name, seldom when preceding.

Ceding the Hango peninsula in exchange for a lease of the Porkkala peninsula; born in Chekiang province; on the Ohio river; Oak avenue; Wise county. Cape Sable; but county Sligo or Cork.

NOTE 2. When such a generic term accompanies two or more specific names, usage is divided between a capital and lower-case initial.

## Punctuation, Compounds, Capitals, Etc.

The Leeward and Windward islands or Islands; at the confluence of the Allegheny and Monongahela rivers or Rivers.

(19) **Generic political terms that form an integral part of a specific proper name, denoting a political division, such as colony, department, dominion, empire, kingdom, republic, state, territory, etc.**

The Holy Roman Empire; the Province of Quebec; the State of Ohio; the Third Republic.

(20) **Names of definite geographical divisions.**

The Orient; the Old World; the Middle East; the Middle West.

(21) **Points of the compass used to designate geographical portions of a country or divisions of the world, also nouns or adjectives derived therefrom.**

The South; the Northwest; a Northerner; cooked Southern style.

**NOTE.** When used to denote direction only, points of the compass are not capitalized (due east; go west).

(22) **Abstract ideas or inanimate objects personified and names of seasons only when personified or sometimes when referred to specifically or with special connotations.**

Do the bidding of Nature; the Winter at Valley Forge; the Plague Year of 1666; where Spring her verdant mantle cast.

(23) **All words in titles of books, periodicals, essays, poems, except unemphatic prepositions, conjunctions and articles; academic degrees and the abbreviations.**

Shakespeare's *Taming of the Shrew*; the *Journal of the American Medical Association*; "Phosphorus: Bearer of Light and Life," *Scientific American* 178:101 ff.; Doctor of Laws (LL.D.).

**NOTE.** In cataloguing and often in bibliographies only the first word and proper names are capitalized in titles of publications.

(24) **The article *the* when part of a proper name or title or when incorporated as part of the legal name, but usually not in referring to newspapers and magazines in running text, only in citations of references.**

The Honorable William E. Borah; *but*, the *Chicago Daily News*; the *Saturday Evening Post*.

(25) **Particles in American names but in foreign names only when not preceded by a forename, a professional title, or title of nobility or of courtesy:**

Reginald De Koven; Della Crusca; Von Moltke (Count von Moltke).

(26) **German common nouns that have not been Anglicized, when used in English text.**

Frau; Kamerad; Kultur; Lawine; Junker; Luftwaffe; Turnverein; Weltschmerz.

**NOTE.** Anglicized German nouns may be written with a small initial letter (*blitzkrieg*; *gestalt*; *kriegspiel*; *leitmotiv*; *pumpnickel*; *rathskeller*; *sauerkraut*; *stein*; *ablaut*; *umlaut*).

(27) **Names of registered trade-marks.**

## MISCELLANEOUS

### THE USE OF ITALIC TYPE

**Italicize unnaturalized foreign words and phrases used in an English text.** In manuscript a single underscore indicates italics.

*Ancien régime*; *Anschluss*; *Autobahn*; *Bushido*; *cognoscente*; *de trop*; *dolce far niente*; *jeu d'esprit*; *mañana*; *noblesse oblige*; *rapprochement*; *Te Deum*; *Zeitgeist*.

**Italicize titles of books (not parts of books), plays (having book format), works of art, symphonies, magazines, newspapers, also names of ships and aircraft (cf. rules for quotation marks, above), but not the Bible or its books.**

Robert Penn Warren's *All the King's Men*; Michelangelo's *David*; the *Christian Science Monitor*; Lindbergh's *Spirit of St. Louis*.

**Italicize a word spoken of as a word, a phrase as a phrase, a letter as a letter (except that a letter indicating shape is printed in type most nearly depicting the shape; thus, V-shaped; I beam).**

The pronoun *that*; avoid the solecism *he don't*; insert a capital S.

**Italicize New Latin scientific names of genera, species, subspecies, and varieties (but not groups of higher rank, as phyla, classes, orders) in botanical and zoological names.**

The quahog (*Venus mercenaria*) has a thick shell.

### BIBLIOGRAPHIES

In making bibliographies, catalogues, and the like, the author's last name comes first, followed by his other names in full or his initials or his first name when he has only one; followed by the title of the book usually in italics; followed by the place of publication, the name of the publisher, and the date. Before a second work by an author, the author's name is represented by a prolonged dash, and a second listed edition of a particular work by two long dashes or the abbreviation *Ibid.* in italics. Citations of periodicals or newspapers include the author's name, the title in italics, the volume, paging, and date. Arrangement of items in a bibliography may be by classification of subject, or chronological, or alphabetical. Practice varies between capitalizing all important words in titles or only the first word and proper names. In strict practice an initial *the*, *a*, or *an* of a title is used, but in common

practice the definite or indefinite article is omitted, as it is usually omitted in cataloguing, except in cases where the article has essential meaning.

Indentation varies according to the relative fullness of entries and the relative importance of the author's name, the title of the work, and any added annotation. In the full form the author's name stands alone, the title being indented on the next line; in the brief form the title follows the author's name on the same line. Indentation of the author's name, with the next line beginning flush with the margin, giving the entry the form of a paragraph of text, is permitted by some authorities.

The *Macbeth* item below is shown first arranged according to the full form and second according to the brief form. The succeeding items, each unrelated to the others, may serve to illustrate various approved adaptations of the basic formula:

Shakespeare, William

# PREPARATION OF COPY FOR THE PRESS

## GENERAL SUGGESTIONS

1. Copy should be prepared on single sheets of paper of a uniform size, *one side only* being used. Sheets of the ordinary commercial letterhead size ( $8\frac{1}{2} \times 11$  inches) are the most convenient. The sheets should be numbered, and plain white or neutral (gray, yellow, or brown) paper is best.

2. Copy should be typewritten and double-spaced, except that quotations and footnotes that go in smaller type may be single-spaced. A duplicate should be kept for reference and as a safeguard against loss in transmission, but no carbon or mimeographed copy should be sent to the printer. The first line of each page should begin not less than an inch from the top of the page, and there should be a blank margin of an inch and a half at the left side of the page. Sheets should be numbered consecutively. Any necessary insertions of more than a sentence should be on sheets of the same size as the rest of the copy, labeled 'Insert 41-A' or the like and included immediately after the page on which the proper point of insertion is marked 'Insert A.'

3. Copy should embody the final ideas of the author. Allowance must be made for some changes, but, to avoid expense, the copy as sent to the compositor should be as complete and perfect as possible.

4. Footnotes. A reference from the text of a work to a note that is to appear at the foot of the printed page should be indicated by a superior figure following the word to which the note refers and corresponding with the superior figure preceding the note. The figures should run consecutively through each chapter or article. The material constituting the footnote should be entered immediately below the line to which it refers and should be separated from the text by lines running entirely across the page. Names of publications should be abbreviated in the references only after giving the full title and data at the first appearance of each title.

5. All proper names, technical and scientific words, references, quotations, and figures that appear in the MS should be verified.

6. Spelling should be uniform. For words that have two or more accepted spellings, one form should be adopted and adhered to throughout. When two spellings are shown in this dictionary, separated by a comma or by an italic *or*, the one printed first is in general to be preferred but the second is acceptable, sometimes equally acceptable with the first.

7. Capitalization and punctuation should be used according to a uniform style. For rules see the preceding sections on *Punctuation* and *Use of Capitals*.

8. Paragraphing should be indicated on copy, not left to the compositor or proofreader. To indicate a new paragraph the symbol ¶ is used.

9. The title page, preface, table of contents, and list of illustrations or tables should accompany the MS.

10. The kind of type to be used, if not ordinary roman, is indicated by underscoring. Underscore once for *italics*, twice for SMALL CAPITALS, three times for CAPITALS, and once with a wavy line for bold-faced type.

11. Manuscript should be kept and mailed flat. If necessary, it may be folded, but it should never be rolled.

## CORRECTION OF PROOFS

12. Corrections on proof sheets should be made by means of the standard proofreaders' marks in the margins directly opposite the indicated errors, usually in the nearer margin. For every correction marked in the text there must be a corresponding direction or mark in the margin, either the same mark as is used in the text or an abbreviation representing the direction. These marks must be kept strictly in order of occurrence and marks in the same horizontal line separated from each other by a diagonal mark, or virgule (/), or a similar vertical mark. This mark is made after every punctuation mark inserted and is often made after every marginal mark.

13. Queries on proof sheets must be answered. If the proposal is approved, striking out the query mark is sufficient; otherwise write the answer.

14. All final changes should be made on the galley proof because changes on subsequent proofs are more expensive; subsequent proofs are for verification only. In making changes the author should keep in mind that the alteration of a few words at the opening of a paragraph may require the resetting of the whole paragraph, and in linotype work the alteration of a single comma requires the resetting of the whole line.

15. The original manuscript should be returned unchanged with the corrected galley proof.

16. An index should be compiled — if the book is likely to be used for reference — beginning with the arrival of the first page proofs and should be sent to the printer immediately following the final page proofs.

## PRINTING TERMS

**body.** — The solid rectangular metal base supporting the face of a printing type. Sizes of type are determined by the measurement of the type body from the front (containing the nick) to the back. See *TYPE*, *Illustr.*, in *Vocabulary*.

**electrotype.** — A facsimile plate, esp. for use in printing, made by taking an impression in a special kind of wax or a sheet of soft lead, depositing in this mold a thin shell of copper, nickel, or the like, by an electrolytic process, and backing this shell with molten metal. The wax mold is rendered conductive for electroplating by coating it with graphite.

**em.** — The portion of a line occupied by any square type body (formerly by the letter *m*, then a square type) used as a unit of measure for printed matter. The em, now usually an em pica, approximately  $\frac{1}{6}$  of an inch (see *TYPE*, in the *Vocabulary*), is the unit of measure for printed matter, esp. of column width.

**en.** — A type body, unit of measure, etc., one half the width of an em (which see).

**end paper.** — A sheet of paper folded and pasted to the first or last leaf of a book to give an extra flyleaf and a paste-down (that is, a leaf that is pasted to the inside of the cover to secure it to the book).

**flush.** — (Set) even with the edge of the type page, usually the left margin; without indentation.

**font.** — A complete assortment of any particular size and style of type; — in British use often *fount*.

**half title.** — The name alone of a book, placed on a separate page or at the head of the first page of text; also, any similar sectional title.

**indentation.** — The setting of a line or lines in from the margin; the beginning of a line or series of lines a little within the flush line of the text. In hanging indentation all the lines of a paragraph except the first line are indented.

**lead (léd).** — A thin strip of type metal, used to separate lines of type in printing; hence, a similar strip of brass. Leads vary in thickness from one half point ( $\frac{1}{44}$  of an inch) to three points ( $\frac{3}{44}$  of an inch) (from twenty-four to four to a pica). The commonest in use is the 2-point.

**Linotype.** — A trade-mark applied to a kind of typesetting machine which produces castings, or slugs, each of which corresponds to a line of separate types.

**make-up.** — Arrangement of type lines and illustrations into page form for printing.

**Monotype.** — A trade-mark applied to a typesetting machine consisting of two units. One, the keyboard, perforates a roll of paper which, when fed through the other, the caster, causes it to cast individual types and set them in justified lines.

**pie or pi.** — To upset or disarrange, as set type.

**plate.** — A page of stereotype, electrotype, or the like, to be printed from.

**proof.** — A trial impression from type, taken for correction or examination; — called also **proof sheet**.

— **author's proof.** The clean proof sent to an author, after correction of the compositors' errors. — **galley proof.** A proof from type on a galley (the printer's steel tray holding type that has been set) before it is made up in pages. The first author's proof is generally a galley proof. — **page proof.** A proof of type that has been made up into page form. — **foundry proof.** A proof for a final reading before the electrotype or stereotype plates are made. — **plate proof.** A proof taken from a plate.

**quad (quadrat).** — A block of type metal lower than the letters, and half a one em, or two, or three ems in width, — used in spacing and in blank lines.

**recto.** — The right-hand (odd-numbered) page.

**register.** — Exact correspondence in position of lines, columns, or pages on the two sides of the sheet, or of the several impressions in a design printed in parts, as in process printing.

**rule.** — A thin type-high plate of type metal with a line or lines as its face. **single rule** has one light line; **parallel rule**, two light lines; **double rule**, a light and a heavy line; **dotted rule**, a line of dots; **wave rule**, a wavy line.

**run in.** — To make (matter) continuous without a paragraph or break.

**serif.** — One of the fine lines of a letter, esp. one of the fine cross strokes at the top or bottom. See **TYPE**, *Illustr.*, in the *Vocabulary*.

**sidehead.** — A subhead placed at or in the side of printed matter. In bookwork, it is usually placed in the left side of the first line of a paragraph.

**signature.** — (1) A letter or figure placed at the bottom of the first page of each sheet of a book or pamphlet, as a direction to the binder in arranging and folding the sheets; — called also **signature mark**. (2) A printed sheet containing a number of pages, as 4, 8, 12, 16, etc., folded as one unit and forming a section of a book or pamphlet; hence, in bookbinding, such a printed sheet or set of sheets folded into four, or some multiple of four, pages; — called also **section**.

**small capital.** — A letter in the form of, but about two thirds the size of, a capital. Small capitals are used chiefly to mark principal parts, plurals, and cross references (as, See **TYPE**, *n.*, 8 b). See § 10, p. 1197. Abbr. *s.c.*, *s. caps.*, or *sm. cap.*

**stereotype.** — A plate made by taking a mold or matrix of a printing surface in plaster of Paris, paper pulp, or the like, and making from this a cast in type metal, commonly with more than the usual percentage of lead. Stereotypes are chiefly used in newspaper and magazine printing, electrotypes for printing books.

**verso.** — The left-hand (even-numbered), page.

## PROOFREADERS' MARKS

Δ or D or Δ (L. *dele*). Dele, or delete; take out, or expunge.

⌘ Take out a letter and close up.

⌘ Print as a ligature; thus, a e (i. e., print æ); also, close up.

v or Less space.

○ Close up entirely; no space.

↻ Turn a reversed letter.

^ or > caret. Insert at this point the marginal addition.

# or # Space, or more space.

Eq. # Space evenly; — in margin.

⌈ or ⌊ or ⌋ Carry farther to the left.

⌈ or ⌊ or ⌋ Carry farther to the right.

⌈ Elevate a letter or word.

⌋ Sink or depress a letter or word.

□ Em quad space; or, indent one em.

$\frac{1}{m}$  | — |  $\frac{1}{em}$  or | — | One-em dash.

|| or | Straighten ends of lines.

≡ or /// or \\\ Straighten a crooked line or lines.

⌞ or ⌟ Push down a space which prints as a mark.

× or + or ⊗ Broken or imperfect type; — used in the margin.

¶ Make a new paragraph.

○ (That is, a ring drawn around an abbreviation, figure, etc.) spell out; — used in the text.

Ⓢ Spell out; — used in the margin.

Ⓢ Period.

Ⓢ or Ⓢ Comma.

Ⓢ or Ⓢ Colon.

Ⓢ Semicolon.

Ⓢ or Ⓢ Apostrophe or single quotation mark.

Ⓢ Double quotation mark.

Ⓢ or Ⓢ Hyphen.

[ / ] Brackets. ( / ) Parentheses.

wf or w.f. Wrong font; — used when a character is of a wrong size or style.

ital. Put in italic type; — in margin, with — under text matter.

rom. Put in roman type; — in margin, with text matter underscored or circled.

bf. Put in bold-faced type; — in margin, with — under text matter.

⌞ Transpose.

tr. Transpose; — used in the margin.

l.c. Lower case; — used in the margin, with a slanting line drawn through the letter in the text.

≡, s.c., s. caps., or sm.c. Put in small capitals; — the double lines being drawn under the letters or word.

≡ or caps. Put in capitals; — the triple lines being drawn under the letters or word.

ld. Insert a lead between lines.

stel. Restore words crossed out; — usually written in the margin (with dots under the words to be kept).

See following page for illustration of the application of these marks.

# COLLEGES AND UNIVERSITIES IN THE UNITED STATES AND CANADA

The first list contains all institutions of higher education in the United States and Territories, according to information available at the date of compilation. It includes some (but not all) branches which retain by general recognition their individual names, but no attempt is made to indicate relationship of one institution to another or connection with a state university system. Recurrent institutional designations are abbreviated as follows:

The entry gives pronunciation, location, kind of student body, and date. Pronunciations not given may be found elsewhere in this dictionary. The location is that of the main administrative center or campus only. The state, or sometimes the city, is omitted when it is part of the title and when no uncertainty is likely. The abbreviation *coed.* (for *coeducational*) is used for institutions which regularly admit women to any one of their academic divisions; otherwise *men* or *women* is used. The word *junior*, as used when not a part of the name, indicates a junior college. The date is intended to be the earliest assignable to the institution's establishment; it is not always the year when the current name was adopted.

Similarly, the second list, beginning on page 1212, contains Canadian institutions.
